Welcome Family and Friends!

Welcome to Ferry Beach Park Association! If you are new to Ferry Beach, we hope you will enjoy your stay here on our beautiful campus. There is material in your room, if you are in a dorm, cabin or cottage that can help you learn more about Ferry Beach. We also want to make your stay as pleasant as possible, so if you need something, don't be afraid to ask, we are here to help. If you haven't been here in awhile, you may find some wonderful new additions: the cabins are available for rent as is Claflin Cottage.

Ferry Beach is more than a great place to spend time with your family. It is also a place of spiritual

renewal and rejuvenation. Every week we create a community of loving friends, working together for the good of all.

Please enjoy your stay and this place. Remember that our community and this campus, are nurtured by your participation and your contribution. Be gentle with each other and this place.

We also hope that you will come back to Ferry Beach either later this summer or consider putting Ferry Beach into your summer schedule in the future!

We have an awesome Labor Day weekend planned this year, a perfect way for any family to cap off a wonderful summer!

Take care of yourself, take care of each other, take care of this place!

In 1901, Universalist minister Quillen Shinn wandered into the wooded pine grove at Ferry Beach and knew it to be a magical place where people would gather together for centuries for rest, relaxation, reflection and renewal.

Beachcombing

Every day at Ferry Beach the tide transforms the coastline. A storm out at sea brings a higher tide and churning waves, or a calm sea a sheet of green glass. Just like the tides, we are pulled by the ebb and flow of the world around us—the people who depend upon us at home, at our workplace, or out in the world. In each now moment, we are being transformed and transforming others by our own energies and actions. Deepak Chopra reminds us that our bodies, just by breathing, transform air into the “exact chemical bonding needed to keep us alive.”
