Psychologists define resilience as the process of adapting well in the face of adversity, trauma, tragedy, threats, or significant sources of stress. Developmentally, we “grow” resilience through life experiences, with the hopes that as we age, we become more resilient. We chose the theme of “resilience” this summer so that we could acknowledge collectively what we have learned through these challenging times and continue to grow and learn from them. We hope you will join us this summer for wonderful conferences, workshops, and activities as well as interfaith services around resilience!
